

Bibliography for ViiV Healthcare Product Pipeline – Integration Stage

Summary

- The ViiV Healthcare product pipeline includes three areas of focus: ultra long-acting medications for treatment of HIV, ultra long-acting medications for HIV pre-exposure prophylaxis (PrEP), and self-administered HIV treatment options.
 - The following citations are relevant to products currently in development that target the integration stage of the HIV life cycle. Citations are listed alphabetically.

INTEGRATION

Cabotegravir Ultra Long-Acting

Han K, et al. Phase I Study of Cabotegravir Long-Acting Injectable Formulations Supports ≥ 4 -Monthly Dose Interval. Presented at the 31st Conference on Retroviruses and Opportunistic Infections (CROI), March 3-6, 2024, Denver, Colorado. [Oral presentation.](#)

VH4524184 (INSTI)

Rogg L, et al. Phase 1 study of VH4524184 (VH-184), a new third-generation integrase strand transfer inhibitor (INSTI) with a unique resistance profile. Presented at the 25th International AIDS Conference, July 22-26, 2024, Munich, Germany, and virtually. [Oral presentation.](#)

Rogg L, et al. Proof-of-Concept Trial of VH4524184 (VH-184), a Third-Generation Integrase Strand Transfer Inhibitor. Presented at the 32nd Conference on Retroviruses and Opportunistic Infections (CROI), March 9-12, 2025, San Francisco, California. Oral presentation. ([slides with Plain Language Summary](#))

VH4367310 (INSTI)

Baker M, et al. Preclinical assessments of a cabotegravir prodrug predicting human dosing durations of > 6 months. Presented at the 25th International AIDS Conference, July 22-26, 2024, Munich, Germany, and virtually. [Poster.](#)
